Office Action Summary

Art Unit: 1615

The Amendment of February 23, 2000 has been entered.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 5-15, 19-27 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The subject matter of "backbone" derivatization is not supported by a description of techniques which those skilled in the art would utilize to prepare products having anti-chemotactic agent or hormone as part of the structure. Also, the term "organic moiety" is not specific to chemical reagents which are disclosed in the specification. A sulfur linkage such as would be part of an S-nitroso group may be defined by "organic moiety", an inexact expression,
